Product Description

CAS 121062-08-6 10mg Melanotan 2 (Mt2) Peptide Melanotan Tanning Injections

MT2, also known as Melanotan 2, is available from Paradigm Peptides in 10 mg vials.

Melanotan 2 (Mt2) is a synthetic version of human alpha-melanocyte stimulating hormone (a-MSH). Originally developed at the University of Arizona in the 1980's and initially designed as a non-tanning option after it was discovered that a-MSH caused arousal in rodents as well as skin darkening, Mt2 was eventually found to have broad effects, For example:

- ◆Increase arousal
- ◆Promotes tanning or skin pigmentation
- ◆reduce compulsions
- ◆control addiction
- ◆fight hunger
- ◆Reduces glucagon production and reverses autistic features

按时发货: 非常满意 (5 stars)

供应商服务: 非常满意 (5 stars)

99% Peptides melanotan2 acetate / melanotan...

It was very straight forward to deal with this company. The items were sent very fast I had timed deadlines (arrived in the UK less than 1 week). The quality was great and I am currently continuing to do business with them. Thank you Shaanxi Hongbaiyi Biotech!
